3. HAZARDS IDENTIFICATION

Emergency Overview: Noncombustible glass beads. Spilled material is extremely

slippery.

Eye contact: When used for abrasive blasting, this material can rebound or

fragment into sharp particles, which are hazardous to the eyes. Material as supplied is practically non-irritating to eyes.

Skin contact: When used for abrasive blasting, this material can rebound or

fragment into sharp particles, which are hazardous to the skin.

Material as supplied is slightly irritating to skin.

Inhalation: When used for abrasive blasting, this material can fragment into

respirable particles and can also generate hazardous air contaminants from the material being blasted. Material as

supplied may cause irritation to respiratory tract.

Ingestion: No known hazard.

Chronic hazards: Not listed by NTP, IARC or OSHA as a carcinogen.
